
ITHEA SAMPLE SHEET FOR PREPARING THE MANUSCRIPTS

Krassimir Markov

Abstract: *The rules for preparing the manuscripts for publishing by the ITHEA are outlined. The form for the papers is shown by this sheet. The abstract needs to be from 200 to 500 words long. Note that the abstract is very important for directing the paper to the right reviewers, including the paper in the right section of the journals or collection in the book series, and referring the paper in the ITHEA International Review Data Base.*

Keywords: *formatting rules (Keywords are your own designated keywords).*

MSC: *If it is needed, please use 2010 AMS math subject classification code: <http://www.ams.org/msc/>*

ITHEA Keywords: *Please use keywords from http://idr.ithea.org/tiki-browse_categories.php .*

Conference topic: *Please point here the right topic of the chosen ITHEA International Conference where the paper will be presented (topics are available on the corresponded conference web-page accessible via <http://www.ithea.org>).*

Introduction

We ask authors to follow some simple guidelines. *In essence, we ask authors to make papers look exactly like this document.* The easiest way to prepare your manuscript in accordance of these rules is simply to replace the content of this sample sheet with your own material.

Responsibility for papers published by ITHEA belongs to authors. Please *get permission to reprint* any copyrighted material. The camera-ready copy of the paper should be received by the ITHEA Journal Submission System (<http://ij.ithea.org>) or respectively by the ITHEA Conference Submission System (<http://ita.ithea.org>); e-mail for questions: office@ithea.org.

Instructions for Preparation of Manuscripts

The authors are hoped to prepare manuscripts in close accordance with the instructions given below.

This text is a sample for preparing the articles. Only true printable ascii characters are allowed in filenames. No blank spaces are allowed within filenames.

Manuscripts must be submitted within the stipulated time and electronic submission in PDF format.

For submitted manuscripts and accepted manuscripts, **name all files** beginning with the journal of conference name, following with the family name of the first author, following with an optional number in case of multiple submissions of the first author.

Figures must be provided in EPS format. Conversion of image files into EPS format can be performed by various softwares such as the Gimp. For instance if the manuscript will be submitted to MDA2012, the files need to be named:

- ITA2017-Brown-1.pdf (for submission)
- ITA2017-Brown-1.tex
- ITA2017-Brown-1-fig1.eps
- ITA2017-Brown-1-fig2.eps
- etc.

Submitted manuscripts should be original and should contain contributions of theoretical, experimental or application nature, or be unique experience reports. Manuscripts will be evaluated for originality, significance, clarity, and soundness, and will be reviewed by at least two independent reviewers. The authors of the accepted manuscripts will be allowed to make a correction in accordance with the suggestions of the reviewers and to submit final camera-ready manuscripts within the stipulated deadline.

Please, write the whole **first name and family** of the authors.

The papers should be organized so as to accommodate abstract, introduction, state-of-the-art, objective, used methodology, obtained results and comparing them with similar results in the world, and references.

The papers need to be well structured.

This means that "Introduction", "Conclusion", "Acknowledgements", "Bibliography" and "Author's Information" need to be separated clearly. The body of the paper needs to be organized in different parts named using appropriate subsections.

Figures and tables should be positioned in the body of the text, as close as possible to the relevant text. Color figures are good for electronic variant but they will be printed in grayscale and some colors may look as equal.

Formulas should be positioned in the body of the text, as close as possible to the relevant text. Put formula and its number in a table row without borders. Align the formula to the center and its number to the right as follow:

$$D = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a} \quad (1)$$

Section title

References in the text should be keyed according to the author-year convention - for instance [Shannon, 1949].

Put list of bibliography after the text of the article.

Author's Information: Finish the article with the personal information for every author separately: optional photo, name of the author, position, organization(s), post and e-mail address(es), optional professional or personal URL, major fields of scientific research (keywords).

Note that the only way to contact the authors is pointed e-mail address in the author's information. Be sure that the addresses are written correctly. If you (or your internet provider) use anti-spam protector write the way to access the e-mail address.

Conclusion

This exemplar is meant to be a model for manuscript format. Please make your manuscript look as much like this exemplar as possible. In case of serious deviations from the format, the paper will be returned for reformatting.

NOTE: Every manuscript submitted to be published by ITHEA ISS need to be presented by author(s) personally at any of the ITHEA International Conferences.

Membership of ITHEA ISS is free and may be done by registration at <http://www.ithea.org> and <http://www.foibg.com>.

Acknowledgements

Thanks...
